PAP-2409 · recall rehearsal

Ember & Oak · demo

Record time 22 Sept 2026, 04:52 UTC | OPEN | Record 4dc1ba11-2689-454d-9bca-50bd0ceb32c6

SYNTHETIC DEMONSTRATION DATA. The organizations, ingredients, batches and contact details in this packet are fictional.

DRILL ONLY. This document rehearses a response. It is not a recall notice, and no customer or authority has been contacted.

Practice tracing smoked paprika from supplier lot PAP-2409. Confirm customer reach and investigate incomplete records.

What the records connect

480 connected finished units / 300 shipped / 180 on hand

3 recorded customers with a connected shipment. Quantities count outputs recorded in units; mass and volume stay in the item register.

4 connected batches / 1 batch needing investigation / 3 connected shipments

Trace source: PAP-2409 - Smoked paprika

A recorded connection follows a path in the saved records. Needs investigation means incomplete records leave the connection unresolved. No recorded connection does not mean safe.

This packet organizes user-supplied records. It does not verify their truth, diagnose a hazard, determine legal recall obligations, or provide a food-safety or regulatory-compliance guarantee.

Source reference: Synthetic production sheet EEO-1909-X; spice lot box left blank.

Recorder notes: The spice entry is missing from the handwritten production sheet. PAP-2409 cannot be ruled out. Investigate before making a recall decision.

SMK-2009-A / NO RECORDED CONNECTION

Smoky tomato · separate lot | Produced 2026-09-20 | Output 240 units

Inputs: PAP-2410: 1.5 kg; TOM-1609: 55 kg; OIL-1509: 2.5 l; VIN-1509: 4 l

Record completeness: marked complete by recorder

Source reference: Synthetic production sheet EEO-2009-A and ingredient-label check.

Recorder notes: Records name a different paprika lot. No recorded connection to PAP-2409 is not a food-safety clearance.

Investigation checklist

☐ CHL-1909-X: Ingredient records are incomplete. A connection to the selected source cannot be ruled out; investigate this batch and its descendants.

☐ Verify source lot identity and the original supplier notice.

☐ Compare the saved input records with production paperwork.

☐ Confirm current stock and shipment quantities.

☐ Have the responsible person review the scope and next actions.

☐ Document any calls, decisions, and corrected source records.

Shipment register

Connected shipments and shipments needing investigation are listed separately by their record status.

Subject: [DRILL - NO ACTUAL RECALL] Traceability exercise - Ember & Oak · demo

Hello Willow Market,

We are rehearsing our traceability process. This is a drill and not an actual recall notice.

Our saved records identify these shipments for review: SHP-1909-01 (SMK-1809-A), SHP-2009-02 (CHL-1909-X). At least one shipment needs investigation because the input record is incomplete; a connection has not been established for that shipment.

Please confirm the quantities received and the quantities remaining, and identify an appropriate contact for follow-up.

[Responsible person: insert verified, product-specific next steps and contact details before sending.]

Thank you,
